

# Public Library Identity and Access Management

## OpenAthens Features:

- SAML SSO and IP proxy solution for providers who support either or both methods
- Utilizes user accounts from ILS to power the single sign-on experience
- Create accounts within OpenAthens for users that may not be in ILS
- Portal to provide users with a friendly starting point for research
- Expert implementation, support and consultative services for any aspect of configuration
- Scalable service for a single library/branch or groups of 100+ libraries
- Integrates with many library systems

Provide seamless access on and off-site.
