

Panorama™

Scaling for the Future

Centralize your library's data and leverage a next-gen analytics platform to keep your library on track for today and tomorrow.

A Platform to Grow with Your Library

Panorama delivers a robust analytics platform built on modern technology that connects disparate data sources. Save time and resources by providing a centralized dashboard for staff and automate the harvesting of data from different sources.

Panorama Technology Features:

- ✔ Automated data feeds with import/export capabilities
- ✔ Hosted data lake and data warehouse to aggregate all data
- ✔ Dynamic dashboards with filtering capabilities

Data Technology to Work for you. Not against you.

Access default dashboards and work with our team to create custom dashboards to meet your library's needs*. Panorama covers a variety of data points and streamlines information into easily accessible and visual dashboards.
